

# ALOE VERA

TYPE:	Annual, Houseplant
SUN:	Bright, indirect light
HEIGHT:	6 to 12 inches
GROWING IT:	Grows best indoors in good light. Being a succulent over watering is a problem, especially in winter when the soil remains moist.
PART USED:	Gel within leaves
HARVEST:	Cut off a piece of the leaf to reveal fresh gel.
USES:	Gel may be applied externally to minor burns, sunburn, insect bites, minor cuts, and skin irritations.
